The following is an examiner's statement of reasons for allowance:

Applicant's arguments filed on January 29, 2007 have been found to be persuasive. Applicants' claimed invention is directed to a method for esterifying a fatty acid, an oil or a fat by *dispersion* of low alcohols using a dispersion machine to create a dispersion form having a globule size between about 1 μm and 50 μm . In contrast the Ergun reference teaches a process for esterifying a fatty acid using low molecular weight alcohol by *emulsifying* the reactant. Emulsification inherently causes long or infinite separation, whereas the dispersion process of the present invention allows for rapid phase separation. Furthermore, the Ergun reference does not disclose any globule size at all. Therefore, one ordinary skill in the art would not be motivated to modify the Ergun *emulsification's* process to arrive at a dispersion process. There is no motivation to do so.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jafar Parsa whose telephone number is (571)272-0643. The examiner can normally be reached on 8 a.m.-4:30 p.m. (M-F).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thurman Page can be reached on 571-272-0602. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
